REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claim 1 has not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest *a catheter assembly comprising : a proximal collar and a distal collar, the proximal collar fixed to the catheter shaft and the distal collar fixed to the catheter shaft, each collar having a non-activated state and an activated state, in the non-activated state the distal balloon waist being rotatable about the distal collar and the proximal balloon waist being rotatable about the proximal collar, in the activated state the proximal collar being expanded to sealingly engage the proximal balloon waist and the distal collar being expanded to sealingly engage the distal balloon waist, in combination with the rest of the claimed limitations as set forth in claim 1.* As to claim 56, the prior art does not teach the invention including, *one or more collars disposed between the outer surface of the catheter shaft and at least one of the proximal waist and distal waist of the balloon, the one or more collars including an electro-*

active polymer material having a contracted state and an expanded state, wherein the balloon is rotatable relative to the catheter shaft when the electro-active polymer material of the one or more collars is in the contracted state and the balloon is sealingly engaged to the catheter shaft when the electro-active polymer material of the one or more collars is in the expanded state, in combination with the rest of the claimed limitations as set forth in claim 56.
